Re: Self-certification Letter – Arizona Corporation Commission – Decision #63552
Docket Control #L-00000V-00-0106

Dear Ms Battista:

This Self-certification Letter refers to the above Decision Number for the Certificate of Environmental Compatibility ("CEC") for Gila Bend Power Partners, LLC's project in Gila Bend, AZ. The power generation station and site referred to in the CEC Decision has been delayed due to market conditions. The activities relating to the initial conditions established by the CEC document are as follows and reference numbers correspond to the conditions as numbered in the CEC:

1. The construction of the power generation station has been delayed due to market conditions; however, its construction and operation will comply with applicable air and water pollution control standards and regulations, and with all applicable ordinances, master plans, and regulations of the State of Arizona, the County of Maricopa, the United States, and any other governmental entity having jurisdiction.
4. The Interconnect Agreement with the transmission provider will be submitted to the Arizona Corporation Commission when completed and signed.
5. Gila Bend Power Partners, LLC is a member of the Western Systems Coordinating Council now known as the Western Electric Coordinating Council. The Reliability Management System ("RMS") generator agreement will be filed as part of the control area operator's master RMS agreement.
8. The NOx emissions requirements for the project, as established by Maricopa County, Department of Environmental Quality, as a maximum, will not exceed 2.5 ppm.
9. The design for the project will meet HUD or EPA residential noise guidelines or OSHA worker safety standards.
10. The project substation and switchyard design is based on a breaker and one-half scheme.

Arizona Corporation Commission

Page Two

11. Gila Bend Power Partners, LLC has entered into a Development Agreement with the Town of Gila Bend encompassing this requirement.

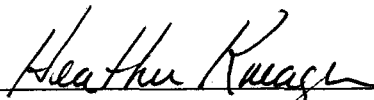

15. The Gila Bend Power Partners, LLC has obtained a Certificate of Environmental Compatibility, Decision # 63776, which meets this requirement.

16. The project design can accommodate two transmission lines emanating from the plant switchyard.

The items of the CEC conditions not addressed in the above Self-certification Letter are part of the overall project plan, and will be included in the plan as required by the CEC document.

Regards,
